2. (Currently amended) A method according to claim 1, further comprising treating, preventing or ameliorating endotoxin-mediated immune activation in body wasting or cachexia in a human patient with liver cirrhosis, ~~chronic obstructive pulmonary disease, chronic renal failure, diabetes, rheumatoid arthritis~~ the method comprising administering to the human patient an effective amount of a compound that is able to reduce the production, absorption and/or the effect of an endotoxin (lipopolysaccharide; ~~LPS~~).

3. (Currently amended) A method according to claim 1 wherein the compound is able to bind to an endotoxin (lipopolysaccharide; ~~LPS~~) molecule.
